

6-Dec-2021_living and learning_Pt 1

(Spirit helper speaking:) Please be mindful that though things do appear in the carnal to be one way, this doesn't make it so; for in the spirit things are oh so different, and differently portrayed. You can't judge and figure out what is beyond the seeable, by the things you can taste, smell, hear, see, touch, and experience while on Earth.

This is just a sample, something to see and learn from, but it's in no way comprehensive and complete; something that shows you entirely what the invisible realm really is actually like. It's a model of sorts, or a simulation actually, to get you to feel and experience things that wouldn't be possible if you were completely and only living in the vast realm of the supernatural.

You try to understand the realm beyond your sight and touch by matching piece to piece, things from this world to that realm. But many things there is just no match for on Earth, and visa versa—many things on Earth have no part in the realm beyond.

You are going to go through quite a change when it is time to switch over to this realm. Much will seem so very foreign to you; besides the fact that you'll need to learn the language, the customs and culture. But you'll have guides to help you make the adjustments. Your school of learning in the next life will start pretty much right away. There will be classes, courses to enrol in, new people to get to know and learn from. You'll be placed at beginner level at first, just so you can get accustom to things. And your progress from there will be at whatever speed you are capable of. Everyone starts at the beginning, then nothing is missed. But if you know many of the lessons, as you learned them well on Earth, you can make fast and speedy progress, skipping long learning programs of things you do know well already.

There is a curriculum for each and every human that has ever lived; a course, or many, that they must be taken through and taught. It's easy and fun in many respects, but tough in others. The balance will be tailored according to what each one is capable of learning. It won't matter then if you were in a wheelchair all your life on Earth, or you grew up in a village too small to even know how to do some of these modern things many people know how to do. It's all about what you did with the spiritual knowledge that was imparted to you. It's a matter of the heart. What did you learn from God, and how did you live it out within your lifetime?

You'll have many teachers, don't worry, you won't be a fish out of water at least not for too long. And many of your "teachers" might be people you know or know of who have passed that grade in Heavenly living, and as part of proving their adeptness have to turn around and show and teach what they have learned to someone who is just getting acquainted with this new life.

You'll get on rather nicely with those who are assigned to teach you a thing or two. They'll like being matched with you, as it's fun to see others making progress spiritually. It'll be a fun challenge. They have to work with different types of people, all who have different mentalities and so need different approaches to help them make spiritual and intellectual progress.

Sometimes there are teachers' meetings to share ideas and strategies, and for special times of prayer. They meet together with others of those who happen to be teaching new comers on a certain level, before they themselves move on to learn things at a higher level and then go on to teach a new batch, or perhaps the same batch, of learners the lessons of the next level up. If you show yourself wise and caring as a teacher for someone on earth, you'll get picked to help instruct others, and this is fun as you get lots of hands on interaction in practical ways; and teachers always get special compensations and privileges, as they need all sorts of things to be available to them as they give their heart and time to teaching others.

Another reason why most if not all do start at "grade one" upon arrival is for healing purposes. It gives them time to recover from Earth life struggles. See, in other grade levels you are required to do something, active giving and sharing, teaching, and fighting in some way. But most people do need a time of reprieve, at least for a bit. Some of the healing might be to pass on messages to others who are still on earth. So that is why someone who just passed away might be permitted to speak a word that gets passed on through the channels to the one on Earth who does need to hear it. It's not that they are now some top commanding officer, but as part of their therapy and adjustment they can pass on a message, often in note form and it gets approved or adjusted, and then taken and relayed to the one it's meant to go to.

The more someone knows the will and ways and Word of God, the less adjustments of their notes are needed; the less corrections there are on the file, so to speak. As they learn more they start to be able to portray the right attitudes and expressions in the messages they might be called on to write or speak.

Oh, it's so much like the learning grades of life in that you need to work through learning this then that. But in another way it's very very, oh so very different than what things are like on earth. As different as night to day in many things. That's why you have to get adjusted to things.

Sometimes is like being in quarantine at first, when you or someone comes to Heaven land. You need to get fitted out and cleansed and all before you go around to this or that place. But once you make the grade and are on the same page as many others, then you can get the joyful reward of attending special gatherings or meeting new people. But there is a time to get adjusted; and it might not involve a lot of people, right at the beginning. Sometimes you'll be called on to do or to attend special events that happen to be on, and aren't for your "grade level" or your level of learning, but special permission is given as it's a help in speeding you on your way learning this and that; the sample of it helps you want to get up to that level real fast. It acts as a speeding-ahead agent, if you have been making good progress.
