

9-Mar-2022_healing living water vision

(Vision:) I had a vision in the early morning. There was a lake of healing water. There were people lying down on the bank, a few of them, me being one. It was like these were lying there to get healing at the healing waters. We needed the angels to help us. These ones couldn't even move.

An angelic being came to me, very close and was begging me to "take the waters in". He would do whatever it took to get me to take in the living waters. "Drink it in" he earnestly, fervently was saying, and was starting to make love to me as he was trying to get some sips of water into my mouth. He was merging with me, pleadingly trying to get me to drink in the water of life.

It was as if the water was the Word plus Spirit—the living word. Like the Holy Spirit and the Word, the living Word, the Words of Jesus, was one and the same; you couldn't have one without the other.

That is what would bring me to health again, and these others too, lying there.

It was like he was saying, what I have done for others was now going to be done for me. I have done what I could, done whatever it has taken, to try to get someone to take in the Word. Now I was going to be ministered unto and helped to take in the living word to bring me to health.
