

Read the story.  
Add colour and  
anything else you'd  
like to draw in the  
pictures.

## God Creates the Universe

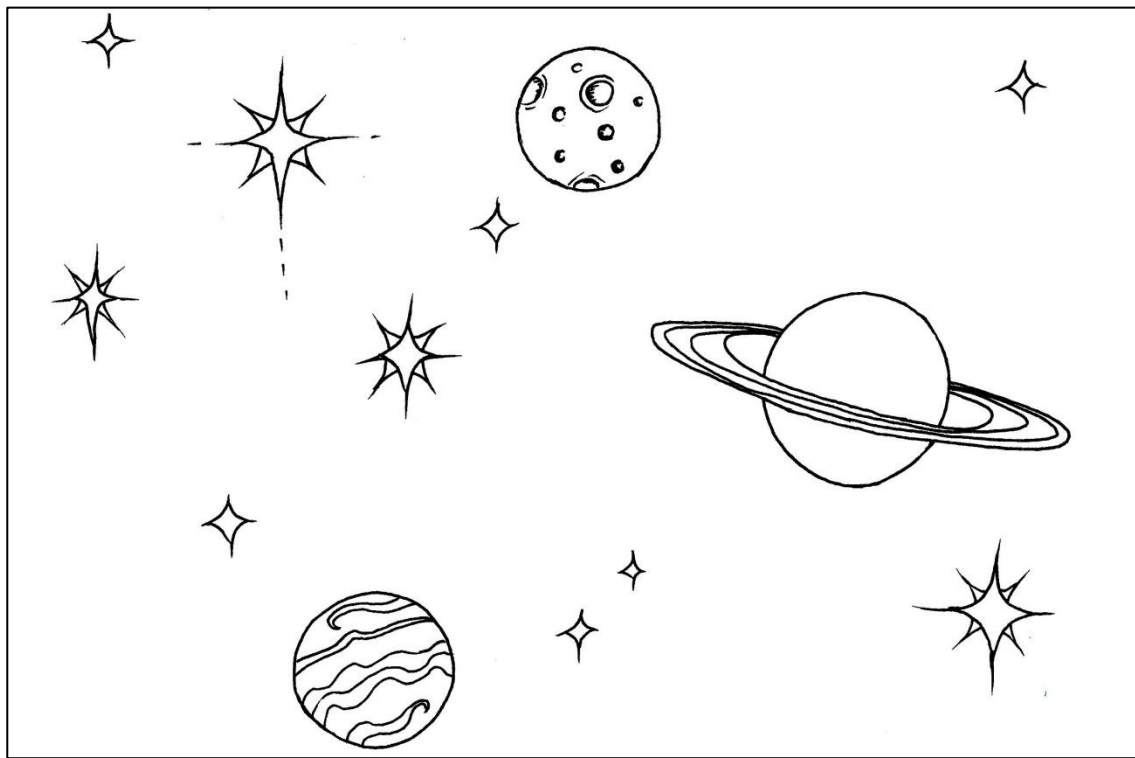

God made some lights in the sky, so  
the Earth  
could have  
what it needs.

He created  
the Sun to

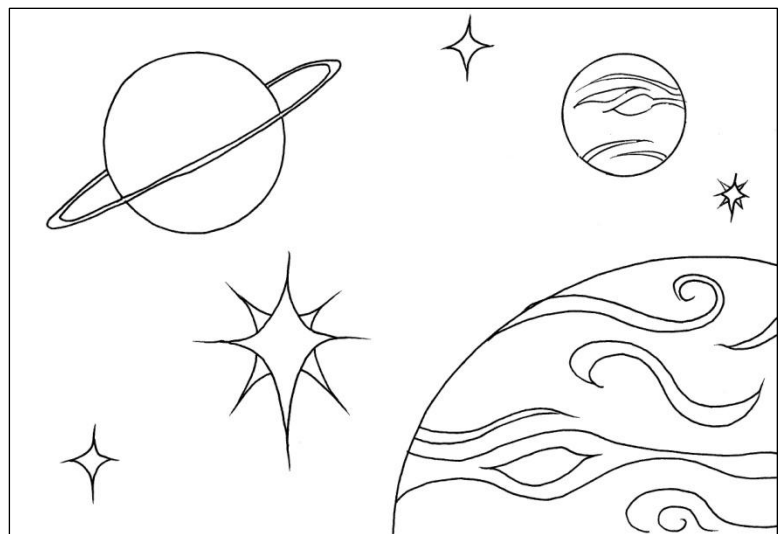

shine and light up the day, and the  
Moon to shine at night.

The Sun helps plants to grow and  
keeps the Earth warm.

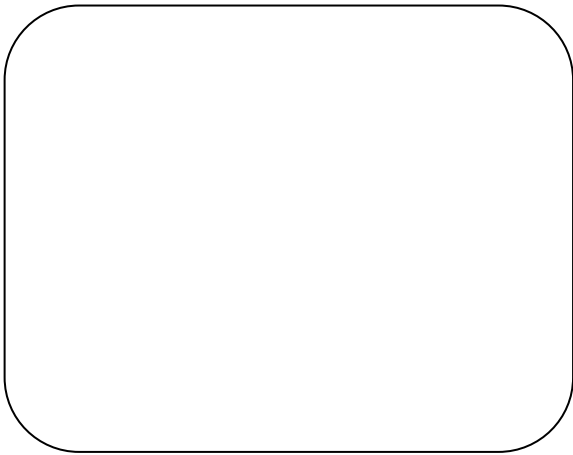

God also added stars and planets in the space surrounding the Earth—a whole universe!

God  
created and  
placed  
everything  
just right so  
that Earth  
would be a great place to live.

## Some jobs of the Sun

Draw something to illustrate the points.

The sun evaporates water changing it into clouds. The rain can water the land and plants, to keep them growing.

Extra water runs into the rivers, lakes, stream and ocean. And it just keeps going. A big water cleaning-and-spraying machine is what the sun helps to run.

Sunlight helps the plants to make the food they need to keep themselves growing.

We can then enjoy edible plants and parts of plants for our food as well.

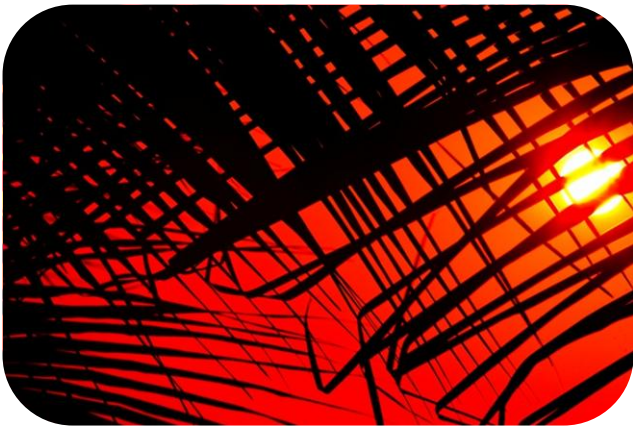

The sun and Earth are just at the right distance away from each other to keep the Earth at the temperature that humans can live on it.

Nature can experience seasons throughout the year, depending on which part of the Earth is closest or the furthest away from the sun; which part is tilting towards the sun or tilting away from it.

The centre of the Earth—at a place that is called the “equator” which sounds a bit like “equal” as it’s the middle of the Earth between the top and bottom halves of the Earth—is nearly always warm, and doesn’t

have cold winters. It is the closest part of the world to the sun, all the time, as it’s in the widest part of the globe, and sticks out closer to the sun.

**graceful** (looking and moving in beautiful, peaceful ways)

**physical** (material or matter that is of the natural world, things that can be seen and touched)

**function** (the normal action, performance or operation of something—the way something is meant to work)

**organisation** (having order and reason, arranging in a certain way, not having disorder or confusion)

**Figure it out:**

\*Each week has 7 days, each year has 52 weeks. How many weeks are in 5 years? \_\_\_\_\_

# Daniel 12:3

They that be wise shall shine as the brightness of the firmament; and they that turn many to righteousness as the stars forever and ever.

Find the secret words in the verse above, and fill in the missing letters.

B \_ \_ \_ W \_ \_ \_ \_ \_  
and s \_ \_ \_ \_ \_ ,  
r \_ \_ \_ \_ and  
b \_ \_ \_ \_ ! Be a  
s \_ \_ \_ \_ for Jesus!
