Animals Are Made

God put fish and sea creatures in the oceans and rivers, lakes and ponds.

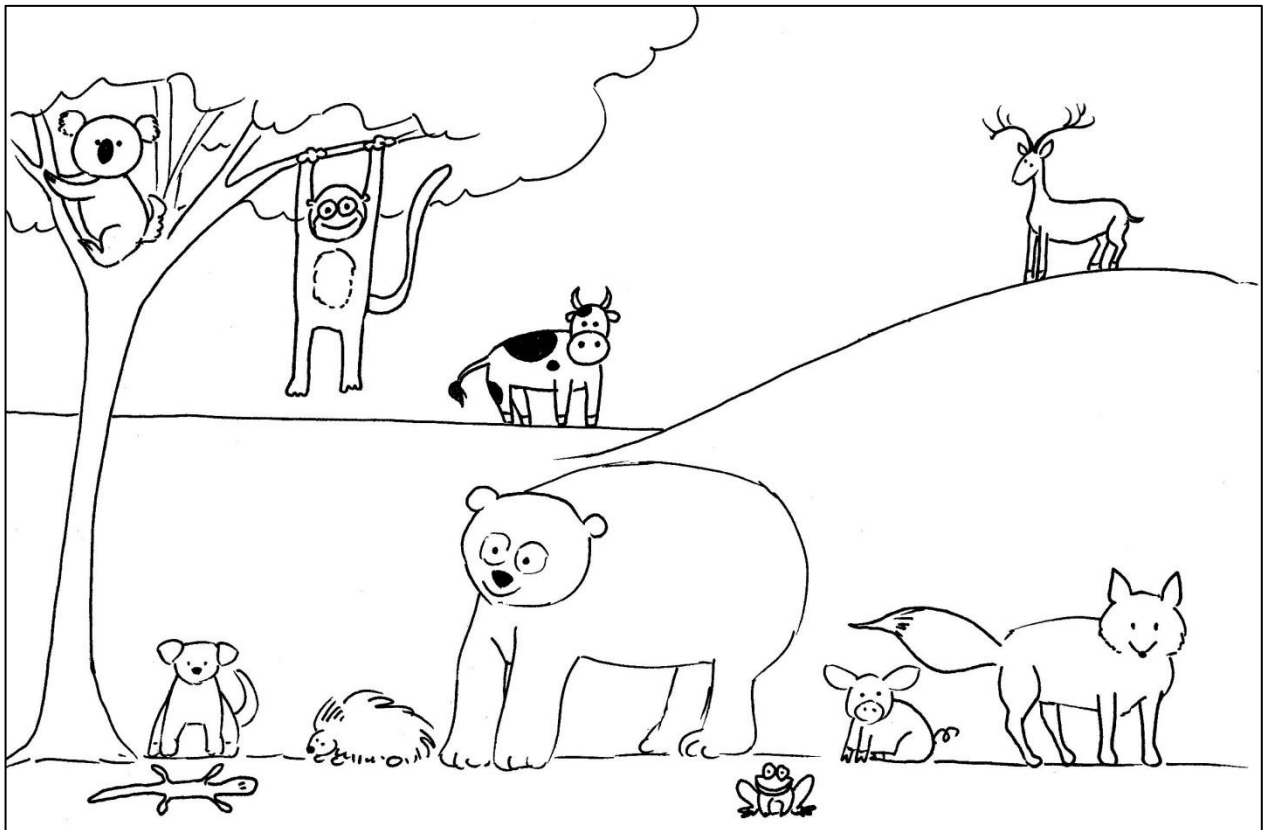

He put birds in the sky, trees, land, and on the water's surface.

Then animals, both large and small, began to explore the new world God had made.

There were huge and heavy animals, and tiny little flying bugs. There were fast-moving creatures and some very slow animals.

Some had feathers, some had fur, some had scales, some had skin, some had shells and some had wings.

God liked them all, and they were all friendly and happy animals.
